

## **Nestlé's Nomination of engazaat for Egypt's Entrepreneurs Awards**

At Nestlé, we are driven by our unwavering commitment to be a force for good, leading the way towards a more sustainable future. We are proud to have partnered with engazaat, the award-winning solar water company, which shares our sustainability goals and vision for a more sustainable future.

Through this partnership with engazaat, we will be able to create an efficient and responsible green supply chain, from farm to table, and create the right and necessary linkages between farming and industry through their unique clean-tech utilities as a service proposition.

As we establish our first clean tech agro-utility, our partnership will enable us to transition towards net-zero operations, increase our local sourcing of sustainable produce, and achieve a water-positive impact.

We believe that by working together, we can foster growth, innovation, and positive impact, as we collectively strive towards a more sustainable world.

engazaat has consistently demonstrated a strong commitment and innovative approach to address the critical water, energy and food nexus in Egypt with their sharing-economy social model that includes small farmers, women and green entrepreneurship all inclusively.

Their expertise in developing and implementing zero capital and zero burdens clean-tech solutions is instrumental in supporting our sustainability goals.

We are confident that engazaat's dedication to innovation will continue to contribute towards a greener and more sustainable world.

**Mahira Hassan**

Head of Corporate Affairs and Sustainability

Nestlé Egypt

Date/ 3<sup>rd</sup> July 2024

To Whom who May concern.

We eAswaaq Misr a subsidiary of e-finance investment group are proud to have partnered with engazaat, the leading independent provider of innovative energy and water developments, solutions and operations

Through engazaat's cutting-edge clean technology in energy and water solutions, we have successfully offered Egyptian farmers access to capital-free, affordable clean energy and smart irrigation systems on the "Agri Misr e-commerce platform" (eAswaaq Misr agriculture market place platform).

Our collaboration with engazaat has proven instrumental in alleviating the financial and logistical challenges encountered by farmers in Egypt to democratize small holders access to clean energy and water through e-commerce and fintech enablement.

Engazaat's steadfast dedication to sustainable agricultural practices is a key factor in paving the way for a more environmentally friendly future for the Egyptian agricultural sector, aligning with Egypt's Vision 2030 for sustainable development and a green economy.

Sincerely,
